# Bokashi Organko 2 Ocean

---

Bokashi Organko 2 Ocean has the same design as Bokashi Organko 2, its older brother. However, as the word “Ocean” suggests, this composting bin focuses on cleaning the oceans. How? Well, it is made from recycled hand-picked fishing nets that pollute the oceans. In addition, 2 € of every purchased Bokashi Organko 2 Ocean goes for ocean cleanups.

As such, if you prioritize clean oceans, this composting bin is the right one for you. Nonetheless, this model comes in a classy black color, which universally fits all homes.
